Description

The Geometric collection has been expanded with a new table light. Geometric accentuates the aesthetic expression and structure of BROKISGLASS, a remarkably distinctive material whose intrinsic beauty and intimacy can now be admired up close. The collection features basic geometric shapes that give each light a singular graphic identity and strike a contrast with the animate, almost sculptural makeup of the elegantly framed glass panels. Resting against a sturdy cylindrical base that houses a concealed touch dimmer switch, the new Geometric Table elicits a subtle aesthetic tension that amplifies the overall visual experience.

Tech. description

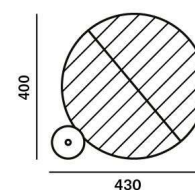

The light comprises a metal frame encased from both sides in BROKISGLASS, while internal LED 24VDC modules with optical elements scatter light evenly across the glass.
