

### Incalmo Suspension LED 3000K White

**DESIGN:**

Carlotta de Bevilacqua  
2015

**MATERIAL:**

Glass, aluminium, methacrylate

**BESCHREIBUNG:**

Incalmo was born: from the initial concept of an optical, thermal and technological machine where every part belongs to a higher system. A human, handcrafted dimension is also taken into account, as the beauty of imperfection is discovered through a reinterpretation of blown glass. The name 'Incalmo' refers to a glass-blowing technique refined in Murano, Venice during the 16th century, aimed at obtaining multiple areas of different colours on the same surface. Incipit and Incalmo operate in perfect harmony, as horizontal, alternating stripes of transparent, white or grey blown glass transform its decorative body into a screening element reaching the areas below its narrower angles and diffusing light into the space. Incalmo is a metaphor for combining the evolving LED technological innovation with ancient craftsmanship skills deeply rooted in our history. The aim of this all-round project is to enhance optical performances while improving the perceived aesthetics of its presence in the environment.
